

Norton Introduces CloserPlus Ramp™ Arm for 7500/7700 and 8000 Series Door Closers

Norton Door Controls is pleased to introduce the CloserPlus Ramp™ (CLP-R) arm. The CLP-R arm uses a new patent pending ramp and plunger design to provide a hold open function with exceptional service life. This heavy duty, dead stop arm is perfect for applications where the door will be held open most of the time. The CLP-R allows the plunger to easily slide into place reducing wear and tear on the arm.

Available on the 7500/7700 and 8000 Series, the CLP-R is ideal for office buildings, retail establishments, assisted living facilities and medical offices.

Please distribute this bulletin to everyone in your distributorship who specifies and/or purchases Norton door closers. Insert this announcement in the Norton section of your Door Controls full line catalog.
