

Security Stucco Column

Introducing the new security stucco column with locking mailbox unit. We've had an overwhelming amount of requests to build our columns with our security insert, so here it is! This attractive stucco column is prefabricated and ready to install. There is no need to hire a contractor, it easily installs over the customer's provided 4" x 4" post in a few hours. The security insert is already built-in and ready to go.

The column has a styrofoam core with a ready-to-paint stucco exterior. As an option, we offer three paint choices: Sandstone, Burnt Tuscan, or Slate Gray. See website for full installation instructions. Dimensions: 26-1/4" x 26-1/4" x 60" (20" x 20" center column).

Three different coating options are available:

Single Coat: This is the standard finish included in the base price. It can be painted with any exterior grade paint.

Double Coat: Also ready to paint, this finish is typically used if you will not be applying a final stucco finish coat. The second layer of cement is thicker and stronger than the standard single coat and is better suited for high-traffic locations where there is a greater chance of surface impacts.

Smooth Cement Coat: Typically used for exterior applications, the surface appears like unpainted cast concrete and it may be faux finished or painted.

Sandstone

Burnt Tuscan

Slate Gray

Front Door

Chute

Rear Door

Built-in security insert: Chute drops your mail out of reach of unwanted hands. The mail drops down to a locking rear door for easy collection. The security insert is made of 16 gauge powder coated steel and includes a separate compartment for outgoing mail.

MAN-STUCOL-S

The Manchester®

This decorative cast aluminum mailbox can be easily inset into a column, pilaster or wall. It features a tough powder coat finish in three different colors. Match the Manchester® with an optional address plaque. See website for additional options.
