

Disposable Gloves

Barrier control products are your first line of defense in the fight against foodborne hazards. Our gloves are tested to the highest standards and provide exceptional value. All gloves are made of USDA-accepted materials and are non-sterile, single-use and ambidextrous.

- Nitrile gloves offer extra strength and sensitivity. Nitrile offers dexterity, better abrasion and puncture resistance, and protection against many harsh chemicals.
- Non-latex gloves look, fit and perform like latex but without risk of latex allergies.
- Vinyl gloves are an ideal, economical alternative for the latex-sensitive user. Vinyl offers a snug fit, yet are easier to slide on and off than latex.
- Poly gloves are the lowest cost single-use hand protection.

Cut-Resistant Gloves

A complete line of knit cut-resistant gloves for value and protection at all levels. Each is exceptionally comfortable, made of USDA-accepted materials and easily laundered. All cut-resistant gloves offer Level 5 cut resistance.

- Whizard® Handguard® II (made of Vectran, Spectra, Silica Fiber & Stainless Steel) offers the highest level of cut resistance of any textile glove.
- Whizard® Knifehandler® (made of High Performance Fibers & Stainless Steel) is a heavy-duty knit cut-resistant glove with enough dexterity to offer butchers excellent knife handling.
- Whizard® Prepguard® (made of Spectra & Stainless Steel) is a light duty cut-resistant glove that remains one of the most popular for foodservice applications.
- C-Kure® brand offers outstanding protection against cuts and lacerations, but at a reduced price.

Chef's Edge® Cutting Boards

C&K's premium commercial brand of hygienic cutting boards and food preparation surfaces. Available in Premium White and Color ID Series. *Available with Microban® Anti-Microbial Product Protection.* Microban is built in to last the life of the board, inhibiting the growth of the bacteria, mold and mildew that can cause stain and odors. Also helps keep boards cleaner between washings. Microban Antimicrobial Product Protection meets strict NSF and EPA guidelines and has been used extensively in food service and manufacturing environments. All Chef's Edge® Cutting Boards offer the following features:

- NSF listed; NSF seal embossed on board
- Easy on knives
- Resists heat up to 185°F – dishwasher safe
- Non-skid finish
- Non-absorbent, high-density extruded polyethylene
- Individually film wrapped
- Won't chip, crack or warp
- Rounded corners
- Non-skid feet (not available on boards with Microban)

MICROBAN is a registered trademark of Microban Products Company.

Richlite® Heat-Resistant Surfaces

Richlite® surfaces are made of resin-impregnated paper composite. Heat resistant up to 200°F for 30 minutes in an oven, or indefinitely under heat lamps. Can hold hot pots, fry baskets and skillets (up to 350°F) while cooling.

- Ideal for cutting boards, pizza serving and prep surfaces and for equipment applications such as steam tables, griddle stands, bread warmers, under heat lamps or carving boards
- Low absorbency – won't transfer odors
- Dense surface protects knives, helps resist dulling
- Stain-resistant even to food coloring and spices
- Dishwasher safe – won't warp

Tomlinson offers complete custom cutting board service. If you don't see it in our catalog, call 1-800-945-4589, ext 112.

- Incorporate cutting boards into your new kitchen design
- Improve the work flow in your kitchen with side-by-side colors or surfaces
- Enforce HACCP food safety procedures by designating areas for food prep
- Plan counter surfaces with built-in, removable cutting boards
- Incorporate built-in, heat-resistant Richlite® surfaces in serving lines or hot food prep areas
- Extra-large or small sizes to fit any space
- Custom hot stamp logos available

Important: Unless specified, standard router diameter is 1/2" (inside radius will be 1/4"), standard dimensional tolerance is +/- 1/16", and all corners and edges are hand beveled.

Shelf Liners

Chef's Edge® Shelf Liners with Microban® Antimicrobial Product Protection are our premium quality liners. Chef's Edge® Shelf Liners feature a rubberized composition that provides greater protection for glass and tableware. They lie flatter and are softer and more pliable than ordinary plastic liners. Microban protection is built in to last the life of the liner, is safe and non-toxic, and is made from FDA-approved materials. Or choose Bar-Mate® Shelf Liner, an economy version of Chef's Edge® Shelf Liner without Microban® Antimicrobial Product Protection.

Case Liners

Grip-Net Case Liners hold fast to virtually any surface and will not absorb or produce odors. They meet FDA requirements for food contact. Use to cushion and protect china or foodstuffs. Or choose Multi-Mesh Case Liners to line refrigerated case shelves. Multi-Mesh Case Liners maximize air circulation and can help you save on repair bills, reduce case maintenance and improve display case appearance. When used in sinks, liners help to capture meat and other debris before it can harm drains and pipes. Both Grip-Net and Multi-Mesh liners are made from FDA-approved materials.

Platters & Underliners Maximum Operating Temperatures

Material	Maximum Temperature
Cast Iron	1700°F (927°C)
Cast & Die Cast Aluminum	850°F (454°C) Melts at 1025°F (552°C) (Blue tip of a gas flame is 1400°F/760°C. Yellow tip is 900°F/482° C)
Stainless-Clad Aluminum	800°F (427°C) (Platters discolor when heated above 500°F/260°C)
Bakelite	350°F (177°C)
Polyester	300°F (149°C)
Wood	200°F (93°C)

Finish Definition

Frosty: As cast, dull finish.

Burnished: Similar to frosty but ball burnished for rich shiny finish.

Stainless-Clad: Stainless steel top surface bonded to an aluminum base.

To retain color and finish on cast aluminum products, DO NOT put in automatic dishwasher. Highly concentrated detergent compounds darken all aluminum. For easy cleaning, use metal wool soap-filled pads.
